

Vein Study Instructions

~ Your doctor has ordered a vein study. This is an ultrasound to map the geography of the veins in your legs to determine if there is any back flow (reflux) present.

~ The ultrasound takes about an hour. The technician will scan both legs while you are lying on your back and also while you are standing. You will be given paper shorts to wear during the test as the veins will be assessed from your ankles up to your groin area.

~ Please eat, drink, and take your medications as you normally would, there are no restrictions. You may drive yourself.

If you need to **re-schedule** your appointment you may call either 847-360-8440 or 847-549-0170. This test is performed in Gurnee at 731 S. IL-Route 21.

Your appointment is scheduled for:
